

Penval Project Support Services Ltd

Environmental Policy Statement

Introduction

PENVAL is committed to environmental sustainability so as to reduce our impact on society. We are working to identify our environmental impacts and will create solutions to reduce these significantly.

Legal Compliance

PENVAL strives to comply with all relevant environmental legislation and regulations that affect the company.

Waste

- Reduce paper consumption by printing double-sided and re-use paper printed on one side for draft printing (unless this risks confidentiality).
- Re-use incoming packaging materials such as boxes and envelopes.
- Use glass and mugs for refreshment purposes as opposed to disposable alternatives.
- Segregate and recycle glass bottles, aluminium cans and plastic.

Energy Solutions

- Reduce energy use by practising simple energy efficient measures such as utilising energy management software on IT equipment and turning off lights when not in use.
- Use low wattage lighting and maximise the use of natural daylight.

Transport Solutions

- Wherever possible to use public transport to and from work and to client businesses.
